

# Japan's model for a bioeconomy - a primer for European SMEs

June 2016

Professor Dr Rolf Schmid

## Contents

1. Executive summary.....	4
2. Scope of this report .....	6
3. Japan’s model of a bioeconomy .....	7
4. Technologies.....	9
5. Major products .....	13
5.1 Raw-material issues.....	13
5.2 Energy from biomass .....	13
5.2.1 Bio-ethanol and bio-butanol from cellulosic biomass .....	15
5.2.2 Biogas .....	17
5.2.3 Bio-kerosene .....	17
5.3 Japan’s “hydrogen society” .....	19
5.4 Biomaterials from “smart cells” .....	20
5.4.1 Biopolymers.....	21
5.4.2 Other materials.....	23
5.4.3 Agricultural and food products .....	24
6. Markets and industries.....	27
6.1 Markets .....	27
6.2 Companies.....	27
6.3 Venture companies .....	30
6.4 Japan Bioindustry Association (JBA).....	31
7. Government and academia .....	31
7.1 METI-related activities .....	32
7.2 MEXT-related activities .....	33
7.3 MAFF-related activities .....	34
7.3.1 R&D under NARO.....	34
7.3.2 Biomass towns.....	34
7.4 Public-private partnerships .....	35
7.5 Academia .....	36
7.5.1 Universities .....	36
7.5.2 RIKEN .....	37
7.5.3 Other relevant National Centres .....	37
8. Contextual framework.....	37
8.1 Safety issues .....	37
8.2 Tax issues.....	38
8.3 Venture capital .....	39
9. How to get involved.....	40
9.1 General remarks .....	40
9.2 Public procurement.....	41
10. Contact addresses and exhibitions .....	42
