

Industrial (“White”) Biotechnology in Japan: Company Activities and Government Programs – and How to Become Involved. A Primer for European SMEs

February 2016

Rolf Schmid

Table of contents

Executive Summary.....	2
1. Japan – a high-tech nation without raw materials nor energy base.....	2
1.1 related key figures of Japan’s national budget.....	4
1.2 deficiencies in food and agricultural/forestry raw material supply.....	4
1.3 deficiencies in raw materials for goods and energy.....	5
1.4 S&T as a key factor to counter these deficits.....	5
2. Three major and some minor targets of industrial biotechnology.....	6
2.1 biofuels.....	6
2.2 biopolymers.....	8
2.3 materials of high added value.....	9
2.4 other targets (bioremediation, bio-recycling etc.).....	10
3. Company sectors.....	10
3.1 active in biofuels.....	11
3.2 active in biopolymers.....	13
3.3 active in materials of high added value (specialties).....	15
4. Government policies on biotechnology R&D “to close the gap”.....	17
4.1 METI, AIST and NEDO.....	17
4.2 MHLW and its organizations.....	18
4.3 MAFF and its organizations.....	18
4.4 MEXT, JST and their programs.....	18
5. Public-private partnerships in industrial biotechnology.....	20
6. Opportunities for European stakeholders.....	21
